Subject Index of Volume 185

Alloys
  application of grain boundary engineering concepts to alleviate intergranular cracking in Alloys 600 and 690, 39
  high temperature performance of dispersion-strengthened Al–Ti alloys prepared by mechanical alloying, 165
  hot-compression behavior and microstructure evolution of pre-alloyed powder compacts of near-γ titanium aluminide alloy, 45
  intermetallic phases produced by the heat treatment of mechanically alloyed Al–Mo powders, 77
  magnetic properties of mechanically alloyed Fe_3Sn, 147
  role of volume fraction in the coarsening of Ni_3Si precipitates in binary Ni–Si alloys, 153
  role of volume fraction in the coarsening of Ni_3Si precipitates in binary Ni–Si alloys, 153
  the dependence of the austenitization kinetics on the type of initial spheroidized structure in low alloy steel, L5
  thermal analysis of phase transformations in a γ-TiAl alloy, 55
Alumina
  elastic behaviour of an aluminium matrix composite reinforced with alumina platelets, L9
Aluminium
  elastic behaviour of an aluminium matrix composite reinforced with alumina platelets, L9
  high temperature performance of dispersion-strengthened Al–Ti alloys prepared by mechanical alloying, 165
  hot work processing, microstructure and mechanical properties of two-phase γ titanium aluminides, 17
  hot-compression behavior and microstructure evolution of pre-alloyed powder compacts of near-γ titanium aluminide alloy, 45
  influence of matrix strength on reinforcement fracture and ductility in $Al–Al_2O_3$ composites, 25
  intermetallic phases produced by the heat treatment of mechanically alloyed Al–Mo powders, 77
  mechanical properties of an *in situ* synthesized Nb/Nb_3Al layered composite, 87
  thermal analysis of phase transformations in a γ-TiAl alloy, 55
Amorphous magnetic wires
  application of amorphous magnetic wires to computer peripherals, 141
Argon
  reactive plasma spraying of $MoSi_2$ using an $Ar–10\%CH_4$ powder carrier gas, 65
Austenite
  the dependence of the austenitization kinetics on the type of initial spheroidized structure in low alloy steel, L5

Carbon
  growth behavior and growth defects of carbon nanotubes, 131
  reactive plasma spraying of $MoSi_2$ using an $Ar–10\%CH_4$ powder carrier gas, 65
  strength of short carbon fibres germinated and grown under hydrogen, L1
Chromium
  secondary ion mass spectrometry and surface profilometry characterization of oxide scales developed over various regions of weldments of 2.25Cr–1Mo steel, 97
Coarsening
  role of volume fraction in the coarsening of Ni_3Si precipitates in binary Ni–Si alloys, 153
Composites
  elastic behaviour of an aluminium matrix composite reinforced with alumina platelets, L9
  fatigue crack propagation in salt water, air and high vacuum in a spray-formed particulate-reinforced metal matrix composite, 1
  influence of matrix strength on reinforcement fracture and ductility in $Al–Al_2O_3$ composites, 25
  mechanical properties of an *in situ* synthesized Nb/Nb_3Al layered composite, 87
Compression
  hot-compression behavior and microstructure evolution of pre-alloyed powder compacts of near-γ titanium aluminide alloy, 45
Computers
  application of amorphous magnetic wires to computer peripherals, 141
Copper
  formation and properties of Mg-based metallic glasses in Mg–TM–X alloys (TM ≡ Cu or Ni; X ≡ Sn, Si, Ge, Zn, Sb, Bi or In), 115
Cracking
  application of grain boundary engineering concepts to alleviate intergranular cracking in Alloys 600 and 690, 39
  fatigue crack propagation in salt water, air and high vacuum in a spray-formed particulate-reinforced metal matrix composite, 1
Crystals
  on the thermodynamic description of grain boundary segregation in polycrystals, 109

Defects
  growth behavior and growth defects of carbon nanotubes, 131
Diffraction
  use of position-dependent stress-free standards for diffraction stress measurements, 123
Diffusion
  comparison of numerical and approximate solutions for second-phase diffusion-controlled growth in finite geometries, L13
Ductility
  influence of matrix strength on reinforcement fracture and ductility in $Al–Al_2O_3$ composites, 25

Elasticity
  elastic behaviour of an aluminium matrix composite reinforced with alumina platelets, L9

Fatigue
  fatigue crack propagation in salt water, air and high vacuum in a spray-formed particulate-reinforced metal matrix composite, 1
Fibres
  strength of short carbon fibres germinated and grown under hydrogen, L1

Fracture
influence of matrix strength on reinforcement fracture and ductility in Al–Al_2O_3 composites, 25

Geometries
comparison of numerical and approximate solutions for second-phase diffusion-controlled growth in finite geometries, L13
Germanium
formation and properties of Mg-based metallic glasses in Mg–TM–X alloys (TM ≡ Cu or Ni; X ≡ Sn, Si, Ge, Zn, Sb, Bi or In), 115
Grain boundaries
application of grain boundary engineering concepts to alleviate intergranular cracking in Alloys 600 and 690, 39
correlation between geometry and chemistry of a near Σ11 grain boundary, 71
on the thermodynamic description of grain boundary segregation in polycrystals, 109
Hot working
hot work processing, microstructure and mechanical properties of two-phase γ titanium aluminides, 17
Hydrogen
reactive plasma spraying of $MoSi_2$ using an Ar–10%CH_4 powder carrier gas, 65
strength of short carbon fibres germinated and grown under hydrogen, L1

Intermetallics
intermetallic phases produced by the heat treatment of mechanically alloyed Al–Mo powders, 77
Iron
magnetic properties of mechanically alloyed Fe_3Sn, 147

Magnetic properties
magnetic properties of mechanically alloyed Fe_3Sn, 147
Molybdenum
intermetallic phases produced by the heat treatment of mechanically alloyed Al–Mo powders, 77
reactive plasma spraying of $MoSi_2$ using an Ar–10%CH_4 powder carrier gas, 65
secondary ion mass spectrometry and surface profilometry characterization of oxide scales developed over various regions of weldments of 2.25Cr–1Mo steel, 97

Nanotubes
growth behavior and growth defects of carbon nanotubes, 131
Nickel
formation and properties of Mg-based metallic glasses in Mg–TM–X alloys (TM ≡ Cu or Ni; X ≡ Sn, Si, Ge, Zn, Sb, Bi or In), 115
role of volume fraction in the coarsening of Ni_3Si precipitates in binary Ni–Si alloys, 153
Niobium
mechanical properties of an *in situ* synthesized Nb/Nb_3Al layered composite, 87

Oxygen
influence of matrix strength on reinforcement fracture and ductility in Al–Al_2O_3 composites, 25

Phase transformations
thermal analysis of phase transformations in a γ-TiAl alloy, 55
Plasma spraying
reactive plasma spraying of $MoSi_2$ using an Ar–10%CH_4 powder carrier gas, 65

Powders
hot-compression behavior and microstructure evolution of pre-alloyed powder compacts of near-γ titanium aluminide alloy, 45
intermetallic phases produced by the heat treatment of mechanically alloyed Al–Mo powders, 77
Precipitates
role of volume fraction in the coarsening of Ni_3Si precipitates in binary Ni–Si alloys, 153

Reinforcement
fatigue crack propagation in salt water, air and high vacuum in a spray-formed particulate-reinforced metal matrix composite, 1
influence of matrix strength on reinforcement fracture and ductility in Al–Al_2O_3 composites, 25
SIMS
secondary ion mass spectrometry and surface profilometry characterization of oxide scales developed over various regions of weldments of 2.25Cr–1Mo steel, 97
Silicon
formation and properties of Mg-based metallic glasses in Mg–TM–X alloys (TM ≡ Cu or Ni; X ≡ Sn, Si, Ge, Zn, Sb, Bi or In), 115
reactive plasma spraying of $MoSi_2$ using an Ar–10%CH_4 powder carrier gas, 65
role of volume fraction in the coarsening of Ni_3Si precipitates in binary Ni–Si alloys, 153
Spray forming
fatigue crack propagation in salt water, air and high vacuum in a spray-formed particulate-reinforced metal matrix composite, 1
Steel
secondary ion mass spectrometry and surface profilometry characterization of oxide scales developed over various regions of weldments of 2.25Cr–1Mo steel, 97
the dependence of the austenization kinetics on the type of initial spheroidized structure in low alloy steel, L5
Stress
use of position-dependent stress-free standards for diffration stress measurements, 123
Surface profilometry
secondary ion mass spectrometry and surface profilometry characterization of oxide scales developed over various regions of weldments of 2.25Cr–1Mo steel, 97

Thermal analysis
thermal analysis of phase transformations in a γ-TiAl alloy, 55
Thermodynamics
on the thermodynamic description of grain boundary segregation in polycrystals, 109
Tin
formation and properties of Mg-based metallic glasses in Mg–TM–X alloys (TM ≡ Cu or Ni; X ≡ Sn, Si, Ge, Zn, Sb, Bi or In), 115
magnetic properties of mechanically alloyed Fe_3Sn, 147
Titanium
high temperature performance of dispersion-strengthened Al–Ti alloys prepared by mechanical alloying, 165
hot work processing, microstructure and mechanical properties of two-phase γ titanium aluminides, 17
hot-compression behavior and microstructure evolution of pre-alloyed powder compacts of near-γ titanium aluminide alloy, 45
thermal analysis of phase transformations in a γ-TiAl alloy, 55

Welding
secondary ion mass spectrometry and surface profilometry characterization of oxide scales developed over various regions of weldments of 2.25Cr–1Mo steel, 97

Zinc
formation and properties of Mg-based metallic glasses in Mg–TM–X alloys (TM ≡ Cu or Ni; X ≡ Sn, Si, Ge, Zn, Sb, Bi or In), 115
